### **Men's Cross-Country Cross Free**

The Cross-Country Cross Free event is very similar to the Sprint, but the competition course features several technical elements (e.g. jumps, turns, etc.) to test the skier's abilities. The Cross-Country Cross Free events are skied in free technique; the skis are prepared with only glide wax and forward motion is created by using the edges of the skis, also called skating.

The Cross-Country Cross Free event begins with individual time trials (qualification) on the competition course with a 10- to 30-second interval start. The fastest 30 competitors advance to the three semi-finals of 10 competitors each. The top two finishers in each semi-final heat and the next four fastest competitors from the semi-finals advance to the final of 10 competitors.
