Women's Skills Challenge

The skills challenge events are individual competitions. Sixteen athletes from different NOCs compete in each event.

Each event consists of a qualification phase and a grand final phase. The qualification phase consists of four rounds and the grand final phase is made up of three rounds (quarter-final, semi-final and final).

The format of each event is the same, with the players competing in the following six skills: fastest lap, shooting accuracy, skating agility, fastest shot, passing precision and puck control. In each skill the players are paired in head to head heats. In each phase an overall ranking is determined for each player based on the total number of points achieved in all six skills.

The top eight players from the qualification phase qualify for the grand final phase. The points from the qualification phase are not carried forward to the grand final phase.

What are the YOG?
