In Skeleton, athletes ride head first and face down, hands and arms tucked close to their bodies.

Both events are held over two heats. Results are calculated by adding the times of both competition heats together with the lowest aggregate time winning.

In the programme there are six training heats to be held over three days. Pilots must have successfully completed at least two practice heats to qualify for the competition.

What are the YOG?

The Youth Olympic Games are essentially about competing, learning and sharing. They are a celebration of sport, youth diversity and the Olympic values of excellence, friendship and respect. They also exemplify the Fundamental Principles of Olympism, blending sport with culture and education. The vision of the Youth Olympic Games is to inspire young people around the world to participate in sport and live by the Olympic values.
